

ABB UNIVERSITY

Learning paths

The path to higher performance

Learning paths for

- ABB Ability™ System 800xA
- ABB Ability™ Symphony Plus / Harmony
- Quality Control Systems
- Advant Master
- Advant MOD

Automation and training go handin-hand. Provide each team member at your site with the proficiency to achieve the highest performance operating, maintaining, programming or engineering your ABB automation equipment, with these value purchasing programs.

Training Passport

Ensure that each staff member, including engineering, programming, maintenance and operations, has adequate training for ABB control systems, multidrives, process analyzers and instrumentation. With the ABB University Training Passport program, twelve months of unlimited in-center training is available for one low price, per employee.

Site Bundle

Ensure each site's team has the advanced training allowing them to perform their best when needed most. With the ABB University Site Bundle program, four weeks of training will earn the site one free week of in-center training. Multiple personnel from the site can utilize the five weeks of training within a twelve month period.

Operator training

Navigate, operate, interpret and react

Operators learn to navigate, operate, interpret and react accordingly to system information. Operator training is delivered on-site, so that operators have access to their site specific process and system information.

COURSE NUMBER: T310

ABB Ability™ System 800xA Operations - Operator

4-5 hours

In this instructor led course, students learn how to operate and navigate in System 800xA. Course will include both interactive class room discussions and hands-on lab, delivered on-site.

Course objectives

This course will give operators an overview of the System 800xA architecture and the function of its' different components. Students will learn to:

- Navigate In a standard Operator Workplace by using Aspect Objects technology
- Read and interpret information from different process displays
- Monitor and control standard process objects through faceplates
- Interpret information on interlocks handle alarm and event lists
- Operate trend displays and interpret the information
- Monitor and control sequences based on Sequence Function Charts

COURSE NUMBER: \$320

ABB Ability™ S+ Operations - Operator 4-5 hours

In this instructor led course, students will learn the professional handling and operation of a Symphony Plus system and how to interpret messages and react accordingly. Course will include both interactive class room discussions and hands-on lab, delivered on-site.

Course objectives

This course will give operators an overview of the Symphony Plus system structure, operator workplace design and layout. Students will learn to:

- Log on to the system and on to an operator workplace
- Understand the contents of an operator workplace
- Call up process graphics
- Control typical monitoring and control functions using faceplates
- · Work with trend displays
- · Handle alarm and event lists
- Navigate in the process using various display types
- Create and modify standard displays
- Work with trend displays and configure user specific trend displays
- Manage alarm and event lists, including filter actions, acknowledgement and call up of context menus from faceplates
