

Schneider Home

Integrated home energy management

Welcome to Schneider Home, home energy management made simple.

Today's homebuyers are increasingly seeking Smart Home features. Winner of both the Omdia Innovation Award and CES Innovation Award (2023), Schneider Home offers the only complete home energy management solution integrated into a single app.

- **Schneider Pulse panel** is the heart of the electrified home, a smart electrical panel that connects all your home's energy sources. Add Square D Control Relays for optional load control.
- **Schneider Inverter** is a high efficiency hybrid inverter for solar and storage that converts solar energy output into usable AC electricity.
- **Schneider Boost battery** stores solar energy during the day and use it during peak rates for utility bill savings and reliable backup power during an outage.
- **Schneider X Series Wiring Devices** are designed for specific outlet control to monitor lights and appliances remotely.
- **Square D Control Relays** provide customizable home automation and control at the circuit level up to 60 A.
- **Schneider Home app** controls it all, giving homeowners the power to monitor, control, and automate their entire home's energy system all through one simple app.

Schneider Home Features

Schneider Home connects and manages your home's electricity, solar, back up battery, and EV charging all through one easy-to-use app. Making savings easy, it automatically uses the most cost-efficient source of energy and provides customizable one-touch, energy-saving settings to reduce your electricity usage. All of this comes in a sleek modern design that eliminates the clutter of conduit and boxes on the side of your home.

Homebuilder Benefits

Energy-conscious homeowners and buyers today are looking for homes with features that can lower their electricity bills. Schneider Home helps you build outstanding energy-efficient homes that save your customers money:

- Offers your buyers more energy efficient, sustainable and resilient homes
- Boost battery takes only 26" of wall space. It is also the thinnest on the market and stackable front-to-back
- All-in-one Pulse panel combines multiple enclosures, reducing clutter on the home's exterior
- Reduces installation time and costs for solar, storage and electric vehicle chargers
- Aesthetically compliments your homes' exteriors
- California Title 24 compliant

Homeowner Benefits

Designed for all your home's energy needs, Schneider Home makes your house efficient, resilient, and sustainable – with minimal effort. Check out some of the benefits and features below:

- Optimize energy use with energy-saving settings and real-time monitoring to save you money while keeping you comfortable.
- Stay powered longer with fewer batteries by choosing where power is used during an outage.
- Reduce your environmental impact by using less energy and shifting to the most sustainable energy source.
- Manage your home's energy use and smart home devices all in a single app.
